About

As a Lead Frontend Developer with 7+ years of experience, I specialize in React and thrive in high-tech, fast-growing environments.

I work with responsibility, discipline, and a strong focus on delivering advanced IT solutions. Passionate about programming, I have excellent communication, problem-solving, and organizational skills.

I'm a team player who excels at collaborating with colleagues and clients to meet project requirements and deliver high-quality results.

Experience

Lead Frontend Developer

Innotech

Mar 2024 - Present · 11 mos

Company: One of the top 30 largest companies in the country, a leader in IT with over 50,000 employees.

Project: ERP HR system

Technologies: React, TypeScript, React-Query, Zustand, Tailwind, ZOD, React Hook Form, Micro-frontends, Vite, Gitlab

Responsibilities:

- Led two complex micro-frontend modules in the ERP system.
- Collaborated with analysts and backend teams.
- Delivered optimized code and participated in feature releases every 2 weeks.

Achievements:

- In the first 9 months of work, more than 700 tasks were closed, including more than 270 bugs fixed.
- Exceeded the annual working plan by 25%. Our team took first place among the entire holding (over 50,000 workers) in terms of functionality produced at the end of the year.
- Designed a survey plugin for an audience exceeding 20,000 users, achieving a bug-free launch.
- Enhanced system stability and scalability, reduced total bundle size by 6% (from 5 MB to 4,7 MB), by extracting 2 critical modules from the monolith and redesigning their architecture and configurations.
- Reduced org-structure module response time by 81% (from 1,1 to 0,2 sec) and ensured smooth performance when handling over 10,000 items by implementing chunked requests on scrolling and adding virtualization.

💎 React.js, React Query and +3 skills

Senior Frontend Developer

Рентгенодиагностическая компания Пикассо · Full-time

Feb 2023 - Mar 2024 · 1 yr 2 mos

On-site

Company: The largest federal network of X-ray diagnostic centers in the country, with over 850,000 patients annually across 66 cities.

Projects:

- ERP system for internal use
- Public platform for doctors and patients

Technologies: React, TypeScript, Redux, RTK Query, Material UI, CSS Modules, React Hook Form, Websocket, Monorepo, FSD, Vite, Docker, Gitlab

Responsibilities:

- Led technology selection and solution design for complex tasks.
- Conducted interviews, onboarding, and mentoring for developers.
- Defined long-term tasks, created user-flows, and developed detailed documentation.
- Led code reviews and ensured best practices in testing and Git flow.

Achievements:

- Passed the way from developer to team lead.
- Built an IT team from scratch, developed processes by which the IT department operated.
- Conducted over 50 interviews and hired 8 developers, created 2 full-fledged teams.
- Regularly gave presentations of new technologies, explained to developers how to use them.
- Increased company's profit by more than 18% by year's end due to reducing the time to process each client.
- Lowered response time by 33,3% (from 1,8 to 1,2 sec) of ERP project by utilizing micro-frontend architecture.
- Achieved a 40% increase in tasks completed per sprint by deploying a new technology stack: RTK Query, Websocket, Material UI, FSD, Monorepo (NX).

💎 REST APIs, FSD Architecture and +4 skills

Full-stack Developer

OOO Internet technologies · Part-time

Sep 2022 - Feb 2023 · 6 mos

Remote

Projects:

- Custom CMS
- Web application for remote management of virtual machines

Technologies: React, TypeScript, Redux, Headless UI, PHP, MySQL, Websockets, CSS Modules, Webpack, Git

Responsibilities:

- Solely developed both projects, handling everything from design and frontend (React) to backend (PHP) and databases (MySQL).
- Designed and implemented full-stack solutions and ensured seamless integration.

Achievements:

- Enhanced user experience and increased customer loyalty by 25% (as measured by retention rates) by implementing a support service chat using Websockets for real-time communication.
- Cut phone operator costs by 66.6% (from 3 operators to 1) and eliminated

the management department by automating customer calls with Mango and integrating Yookassa for website payments.

- Tripled the total number of customers by gaining over 1,000 new clients within a year of the site's launch.

💎 PHP, HTML5 and +9 skills

Full-stack Developer

RLIMB · Full-time

Jul 2019 - Sep 2022 · 3 yrs 3 mos

On-site

Projects:

- Multiple social networks (NDA)
- websites for cryptocurrency, trading, land sales, tourism, transportation, and diamond tools

Technologies: JS, React, TypeScript, Redux, CSS Modules, PHP, MySQL, Webpack, Git

Achievements:

- Configured Apache, Nginx, and Maria DB cluster for enhanced site reliability.
- Developed smart contracts using Solidity for blockchain applications.
- Reduced site response time by 73.2% (from 2.5 to 0.7 sec) by optimizing React modules.
- Implemented a Galera cluster for Maria DB to prevent data loss.
- Increased revenue by 30% through crypto-enabled smart contracts on a social network.
